How a 'turnkey project' works

When building using the turnkey process, the **professional team manages and executes the entire project**, post land transfer to handing over the keys to a completed home, being based at a centrally based office allows the client **easy access** to the **entire team** throughout.

The professional team works together sharing and **integrating its knowledge base** with regards budgets, design, construction and management producing a final cost effective quality product.

Advantages of turnkey

- Experienced centrally located **professional team**
- **Cost effective** and timeous execution
- **Risk free**
- Legal, regulatory and financial **support**
- Guaranteed no **cost** overruns
- 5 year latent defect **guarantee**
- Reactive **maintenance** team
- Bank **approved**
- **Quality**
